

# Frozen Pipes – Social Media Posts 2025

## Social Media Post #1 — Pipe Insulation

### Instagram

❄️ Don't let your pipes get frosty! ❄️

Wrap your pipes in insulation and keep the cold out. Cozy pipes = happy home! 🏠💧

#ProtectYourPipes #VAAWWA #WinterWeather #SayNotoFrozenPipes #WinterReady

### Facebook

Keep your home warm and your pipes even warmer! ❄️ Wrap exposed pipes in insulation to protect against freezing temperatures. Don't let your plumbing turn into an icicle—cozy pipes mean fewer headaches this winter!

## Social Media Post #2 — Thermostat Tips

### Instagram

🔑 Don't leave your pipes in the cold! Keep your thermostat steady at **65–68°F during the day** and **no lower than 55°F at night**. Away for a trip? Keep it cozy to avoid frozen pipes.

#ProtectYourPipes #VAAWWA #WinterWeather #SayNotoFrozenPipes #PipeCare

## Facebook

Keep your pipes warm and happy this winter! 🔧 Maintain a steady temperature in your home: **65–68°F during the day** and **at least 55°F at night**. Heading out of town? Keep your thermostat at a safe, cozy level to protect your plumbing. Small adjustments now prevent costly frozen pipes later!

#ProtectYourPipes #VAAWWA #WinterWeather #SayNotoFrozenPipes #PipeCare

## Nextdoor

Friendly reminder: ❄️ Keep your pipes safe by maintaining a steady home temperature—**65–68°F during the day** and **no lower than 55°F at night**. Going away? Don't let your thermostat drop too low—your plumbing will thank you!
